

JAN NISAR

Data Analyst · Excel, Power BI and SQL Specialist

jannisar187@gmail.com · +92 347-9259417 · Islamabad, Pakistan · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with expertise in Excel, Power BI, SQL, and Python, experienced in transforming raw data into actionable insights through interactive dashboards, automated reporting, and data analysis. Skilled in data cleaning, visualization, KPI tracking, and query optimization, with a strong focus on accuracy, business intelligence, and data-driven decision-making. Proficient in building scalable reporting solutions and delivering clear, impactful insights that support operational and strategic goals.

EXPERIENCE

Jr. Data Analyst

Apr 2024 – Dec 2025

Software Hub, Peshawar, PK

- ▶ Collected, cleaned, and analysed data using Excel, SQL, and Power BI to support business reporting and decision-making.
- ▶ Built interactive Power BI dashboards to visualize KPIs, trends, and operational performance.
- ▶ Wrote SQL queries to extract, filter, join, and summarize data from relational databases.
- ▶ Performed data validation and quality checks to ensure the accuracy, consistency, and completeness of datasets.
- ▶ Prepared recurring reports and dashboards to help stakeholders monitor key business metrics.
- ▶ Identified data trends, patterns, and anomalies to support operational improvements and business decisions.
- ▶ Collaborated with cross-functional teams to gather reporting requirements and deliver accurate, timely insights.

Data Operation Executive

July 2021 – March 2022

Software Hub, Peshawar, PK

- ▶ Managed and validated large datasets using Microsoft Excel, ensuring high levels of data accuracy, consistency, and completeness.
- ▶ Created interactive Power BI dashboards and automated reports to monitor KPIs and support business decision-making.
- ▶ Performed data cleaning, transformation, and validation to identify inconsistencies and improve overall data quality.
- ▶ Collaborated with cross-functional teams to prepare reports, maintain databases, and deliver timely, accurate insights for daily operations.
- ▶ Wrote SQL queries to extract, clean, and analyse data from relational databases for operational and reporting needs.

PROJECTS

Logistics Business Analysis Dashboard

Excel · SQL · Power BI · Data Cleaning · Business Intelligence

- ▶ Designed an interactive Power BI dashboard to analyze logistics performance, customer activity, and order trends using Excel and SQL datasets
- ▶ Cleaned, transformed, and validated raw logistics data using Excel and SQL to ensure accurate reporting and analysis.
- ▶ Developed KPI dashboards tracking Total Orders, Quantity Sold, and Customer Count to monitor business performance.
- ▶ Built interactive visualizations, including geographical maps, decomposition trees, heatmaps, and slicers, enabling dynamic analysis across states, categories, and time periods.
- ▶ Wrote SQL queries to extract, filter, and aggregate data for reporting and dashboard integration.
- ▶ Implemented drill-down and filtering capabilities to help stakeholders identify regional sales patterns, shipping trends, and product category performance.
- ▶ Delivered actionable insights that supported data-driven decision-making through clear and interactive business intelligence reporting.

Superstore Sales Analysis

Power BI · Excel · SQL · Data Visualization · Business Intelligence

- ▶ Built an interactive Power BI dashboard to analyze sales, profit, discounts, and product performance using Superstore sales data.
- ▶ Developed KPI cards to monitor Total Sales, Total Profit, Average Discount, and Total Quantity Sold.
- ▶ Cleaned and transformed raw data in Excel and SQL to ensure accurate analysis and reporting.
- ▶ Created interactive visualizations, including bar charts, line charts, donut charts, and slicers, to analyze sales by category, sub-category, customer, and time period.
- ▶ Wrote SQL queries to extract, filter, and aggregate sales data for reporting and dashboard development.
- ▶ Implemented drill-through and filtering features to enable dynamic exploration of monthly sales trends and customer performance.

Climate Change Analysis

Power BI · Excel · SQL · Data Visualization

- ▶ Developed an interactive Power BI dashboard to analyze climate change indicators, including temperature trends, CO₂ emissions, sea level rise, and extreme weather events.
- ▶ Cleaned, transformed, and validated environmental datasets using Excel and SQL to ensure accurate reporting and analysis.
- ▶ Designed KPI cards to monitor Average Temperature, CO₂ Emissions, Sea Level Rise, and Total Extreme Weather Events.
- ▶ Created interactive visualizations, including line charts, bar charts, and slicers, to compare climate metrics across countries and time periods.
- ▶ Wrote SQL queries to extract, filter, and aggregate environmental data for dashboard development and reporting.
- ▶ Enabled dynamic filtering by country to support comparative analysis of renewable energy adoption, emissions, and climate trends.
- ▶ Presented data-driven insights through intuitive visualizations, helping users identify long-term environmental patterns and sustainability indicators.

TECHNICAL SKILLS

Data Analysis: Excel, Power BI, SQL, Python, Data Cleaning, Data Transformation

Databases: MySQL, SQL Server, Query Writing, Joins, CTE's, Window Functions, Aggregation

Visualisation: Power BI, Power Query, DAX, Data Modelling

Tools: SQL Server Management Studio (SSMS), Git, Jupyter Notebook, Microsoft Office

Practices: Data Analysis, Business Intelligence, Dashboard Development, Data – Driven Decision Making

EDUCATION

Bachelor of Science — Computer Science — Agriculture University, Peshawar

2015 – 2019
